

# SOLAR FARM BUILDER

PV Hi-Tech Solar specialize in building solar farm. With experience building a solar farm, our team of engineer will design most optimum yield solar farm using the latest designing software. Our solar system will use European product such as the inverter for assurance of yield and long design working life.

## • Project Reference

Award Winning KMB 5MWp in Melaka, Malaysia, 2013

### Product Use

- a. Module: PV Hi Tech Solar 
- b. Inverter: AEG AG 
- c. Monitoring System: Skytron Energy GmbH 

# MODULE MANUFACTURER

With a production capacity of 15 MW/year, we producing high quality polycrystalline solar module. PV Hi-Tech Solar modules certified by independent testing institutions IEC 61215 & IEC 61730 - TÜV Saar. The reliability and performance of every module produced is also protected by a leading warranty (10-year product coverage & 25-year linear power coverage).
